However, there shall not be any restriction on mobile vending in such area if vendors continuously move without affecting traffic and commuter movements;

(b) Restricted vending shall be linked with the road width keeping in view the following aspects, namely:

(i) There shall not be any stationary street vending on road having width up to 3.5 meters. But street vending can be allowed on such roads if it is declared as non vehicular road;

(iii) There shall be only one side stationary vending on road having width between 12 meters to 24 meters, while both side stationary vending can be allowed on road having road width of 30 meters or above.

(iv) The number of street vendors shall be decided by considering holding capacity of each designated vending area on such road.

(v) Such stationary vending shall be allowed after taking the clearance from the traffic police regarding the smooth vehicular and pedestrian movement. If required, road side parking shall be banned in such area where street vending is allowed.

(vi) Mobile vending shall be allowed on such road looking to the traffic and pedestrian movement.

(c) In the no vending zones; the town vending committee may decide the distance to be kept free from street vending near the important institutions like the Secretariat, District Collectorate, Office of the Village Panchayat, Municipal Corporation, Municipality, Court,
cantonment board and State archeological monument attracting a high footfall, at its discretion taking into account the specifics of the area concerned.

(d) The town vending committee shall determine special vending zones, for a fixed period, during festival, considering the local as well as general importance or relevance of the festival.

The Committee shall consider the same and dispose such representation within a period of 30 days from the date of its receipt or in the next meeting of the Town Vending Committee, whichever is earlier.

The said restrictions shall form part of the basic conditions of the certificate of vending.

22. Preparation of Street Vending Plan.— (1) The Town Vending Committee shall prepare a street vending plan. The holding capacity of the street vendors of any particular area or locality shall be limited to 2.5% of the population of ward, zone or city, as the case may be.

The unsuccessful applicants shall be given preferential right for relocation as here the provisions contained in this scheme.

(4) In areas having high population and low density of street vendors and where there are adjacent vending areas having high density of street vendors and low resident population, the Town Vending Committee shall devise methods to enable the relocation of street vendors to other populated areas, so as to avoid inequitable concentration of street vendors, heavy flow of traffic and the inconvenience of people in travelling to such high density vending areas.
